

The graph shows a complex network of relationships between concepts. The nodes are labeled with concept names, and the edges represent the relationships between them. The nodes are colored yellow, orange, and red, and the edges are colored red and orange. The nodes are arranged in a hierarchical structure, with 'athlete\_jj\_redick' at the top left, 'concept\_sportsteam\_knicks' and 'concept\_sportsteam\_los\_angeles\_lakers' in the middle, and 'concept\_sportsteam\_rockets' and 'concept\_sportsteam\_new\_jersey\_nets' at the bottom. The edges connect the nodes in a way that suggests a flow of information or a hierarchy of concepts.
