

The graph displays a complex network of concepts and their relationships. The nodes are represented by circles, with yellow nodes indicating a specific type of concept and grey nodes indicating another. The edges are represented by lines, with grey lines indicating a general relationship and yellow or red lines indicating a specific type of relationship or cluster. The graph is densely connected, with many nodes having multiple incoming and outgoing edges. The nodes represent concepts such as teams, coaches, athletes, and locations. The edges represent relationships between these concepts, with some edges highlighted in yellow and red to indicate specific types of relationships or clusters.
