

The graph illustrates a complex web of semantic relationships centered around Phoenix, Arizona. The central node, 'concept\_city\_phoenix', acts as a hub connecting to various entities categorized by color:

- Sports Entities (Green Nodes):** These include professional teams like 'concept\_sportsteam\_nfl', 'concept\_sportsteam\_nba', and 'concept\_sportsteam\_sun\_devil\_stadium'; individual athletes such as 'concept\_athlete\_raja\_bell' and 'concept\_athlete\_shaq\_o\_neal'; coaches like 'concept\_coach\_mike\_d\_antoni'; and multiple stadiums and arenas including 'concept\_stadiumorevenue\_bank\_one\_ballpark' and 'concept\_stadiumorevenue\_arizona\_diamondbacks'.
- Journalists (Orange Nodes):** Notable figures shown include 'concept\_journalist\_mark\_faller' and 'concept\_journalist\_paola\_boivin'.
- Political and Official Roles (Red Nodes):** This category includes 'concept\_website\_arizona\_republic' and 'concept\_politician\_phil\_gordon'.
- General Concepts (Blue Nodes):** A wide array of other concepts are linked, such as 'concept\_company\_continental', 'concept\_transportation\_phoenix\_sky\_harbor\_airport', and 'concept\_person\_wes\_gullett'.

The density of connections from the central city node highlights its role as a primary conceptual anchor in this network.
